HIBIVERA

The product is based on machine learning algorithm and without the use of any cosmetics we can identify reason for hair problem based on their daily activity.

mainly our project helps to hair treatments. such as provide the reason for hair falls. The strength of our project is saving their money for buying hair cosmetics.so the customer can buy any hair cosmetics based on reason of hair falls. The project contain some dataset and the feature values of hair related activity like bath time, shampoo use, oil use, sleep time, tablet used, hair type, hair color, water, work stress, any disease, reason for hair falls ...based on this feature value model will be predict the corresponding person hair falls and correct reason of hair problem.
